CITIZEN SCIENCE

AT YOUR LIBRARY

CONNECT TO A COMMUNITY
of citizen scientists advancing real scientific research.

Wikimedia Commons / Louise Docker

CITIZEN SCIENTISTS ENGAGE
and shape research about human and environmental health and impacts.

ACCESS SPECIALIZED TOOLS
by borrowing kits from your library that will help you participate.

What is citizen science?

Citizen science is real science done by people like you! There are resources to match your interests with real scientific studies. Whether you share pictures from your garden to help track plant and animal species populations or take a walk in your own neighborhood with a personal air monitor, you can contribute!

What can I do at the library?

You can borrow tools from your library that will help you participate in a specific citizen science project. Some projects require specialized equipment, such as a Sky Quality Meter, an air quality sensor, or a special smartphone lens. Your library is part of a first-of-its-kind ASU and SciStarter initiative supported by the Institute for Museum and Library Services (IMLS) to help libraries connect communities to citizen science!
